

BREAKFAST AFTER THE BELL

Good for kids *and* good for California

Q: What is the economic and fiscal impact of increasing student participation in the School Breakfast Program?

A: A 10% increase would generate over \$2.6 million in revenue for the General Fund, offsetting short-term state costs by nearly 60%. It's as easy as 1-2-3.

- 1 School districts operating the School Breakfast Program receive federal and state reimbursements per meal served.
- 2 **A 10 percent increase in student participation would generate \$40.2 million in additional federal reimbursements**, while drawing less than \$4.8 million from the state General Fund.
- 3 School districts use reimbursements to pay for the goods, services, and labor needed to expand and operate school breakfast programs, generating new, taxable economic activity that contributes to the state General Fund.

The figures add up to a **+** for California schools, students, *and* the General Fund.

Nearly 60% of the additional federal funds would be spent to increase staffing or staff hours, creating an estimated **1,000** new jobs.

Healthier, better nourished, and more focused students equal **improved** education outcomes.

+ FEDERAL DOLLARS AND LOW COSTS FOR THE STATE

+ MORE JOBS FOR CALIFORNIA

+ ACADEMIC GAINS

+ TAXABLE ECONOMIC ACTIVITY AND GENERAL FUND REVENUE

	Taxable Economic Activity	Resulting General Fund Revenue
Directly Impacts	Personal Income	\$23,829,335
	Corporate Profit	\$1,004,864
	Taxable Sales	\$1,668,074
	Indirect and Induced Output	\$42,703,343
Total General Fund Revenues Generated		\$2,686,318
